ABOUT ME

I am a 3th year Computer Science student at the Computer Engineering department of Bilkent University.

I am especially interested in project management, task automation projects and complex algorithms. I am also excited to learn new technologies and enhance myself by acquiring new skills.

SKILLS

EDUCATION

Undergraduate – 2.93 CGPA

Bilkent University
2018-

Cyber Security Winter Camp

Boğaziçi University
2019

EXPERIENCE

Junior Software Engineer

LOGO Yazılım

I worked at LOGO yazılım 6 months as a part time full-stack developer. After my internship, my supervisor wanted me to continue as a part-time software developer. Working at LOGO gave me a lot of experience with real-life examples of implementing a software with a team. I had a crucial experience about web-based development with debugging, optimizing, testing and implementation. I left LOGO because I wanted to graduate early. Frameworks, tools and languages that I have learnt and experienced in this experience is listed below.

- Angular 2 using html, css, js, ts, front-end development,
- .Net core framework using C#, backend development,
- dotTrace Profiler usage for optimization,
- Postgresql database usage,
- Swagger, Jenkins and Postman helper tools usage,
- Agile development process with Jira and
- Most importantly teamwork

Summer Intern

LOGO Yazılım

I interned at LOGO yazılım for 1 month. This internship gave me the first experience on web development. I used Angular and .Net Framework to implement a simple project.

- Angular 2 using html, css, js, ts, front-end development and
- .Net core framework using C#, backend development
